VARUN BEDI

Ph: 201-406-4217 | E-mail | LinkedIn | TPM Portfolio | Ashburn, Virginia
Authorized to work in the U.S. without sponsorship

Technical Program Leader | Platform Integration | Cloud Infrastructure & FinOps

PROFESSIONAL SUMMARY

Technical program leader with 18 years in technology and 10+ years leading platform integration, cloud transformation, and enterprise modernization. Leads programs across Engineering, Product, Data, Finance, and business teams, connecting technical dependencies and launch readiness to customer and business outcomes.
Experience includes migrations affecting 3.11M+ customer organizations, cloud cost optimization across infrastructure and ML workloads, and AI-enabled program workflows. Combines software engineering and service-delivery experience with executive governance, vendor management, and cross-functional leadership.

CORE EXPERTISE

Program Leadership: Integrated Planning & Execution · Roadmap & OKR Governance · Risk & Dependency Management · Executive Steering · Customer Migrations & Launch Readiness · Budget, Vendor & Stakeholder Management · Agile / Hybrid Delivery

Technical Domains: Platform & API Integration · Cloud Transformation (GCP, AWS, Azure) · FinOps & Cloud Cost Governance · Data Platforms (BigQuery, Kafka pipelines) · AI-Enabled Program Operations · Security & Compliance Governance

Tools: Jira · Airtable · Confluence · Notion · ServiceNow · Smartsheet · Google Sheets · GitHub · Grafana · Looker · Claude

PROFESSIONAL EXPERIENCE

Unity Technologies — Ads Product & Engineering

Staff Technical Program Manager — **Apr 2025–Present**

Ashburn, Virginia · Unity Ads — Global advertising technology organization · Promoted from Senior TPM

- Led integrated planning, dependency resolution, rollout sequencing, and launch readiness for a five-product Ads platform unification spanning seven workstreams and 150+ contributors; established monthly executive steering and weekly leadership reporting.
- Scaled migration from 15-organization pilots to production waves of 10,000+, migrating 3.11M non-Ads and 14,483 Ads customer organizations representing $26.8M in ad spend within two months of general availability.
- Built an AI-enabled customer-feedback workflow using Claude to classify customer reports, link issues to planned fixes, and provide Sales, Account Management, and Support with self-service visibility into resolution status.
- Led cross-team planning and technical trade-off discussions for a GCP/AWS cloud-platform strategy, aligning two infrastructure teams on testing, support ownership, dependencies, and a 99.9% uptime KPI.
- Led a FinOps optimization program with ML feature-platform, inference, and Ads Exchange engineering, establishing team-level cost ownership and incorporating cost into engineering roadmaps; BigQuery optimization reduced costs by 48%, approximately $35K per day against Finance's billing forecast.
- Co-led an AI knowledge-assistant proof of concept that expanded into a company-wide knowledge program; coordinated engineering demonstrations, roadmap governance, Legal review, and planning following SVP sponsorship.

Senior TPM - Ads PMO — **Jul 2022–Mar 2025**

Toronto, Ontario · Unity Ads — Global advertising technology organization

- Created roadmap governance for a 200+ person Ads organization across 10+ engineering pods in AMER and EMEA. Consolidated 2,000+ records into a single source of truth, reducing missing roadmap data from 27% to 8% and improving on-time delivery from 35% to 59%.
- Served as the embedded program partner to Ads Infrastructure, defining the cloud-platform consolidation charter, decision rights, integrated roadmap, and dependency model while aligning engineering leadership on capacity, production readiness, and execution risks.
- Delivered EU Digital Services Act compliance with no missed regulatory deadlines, coordinating Legal, Support, and Marketing on complaint handling, moderation, and transparency reporting; also led SOX control reviews with Finance and Internal Audit.

EQUIFAX CANADA INC. — Infrastructure & Cloud Services

Sr. Program Manager — Planning & Execution (P&E), IaaS **Nov 2019–Jul 2022**

Toronto, Ontario · Data, analytics, and technology company

- Managed planning and execution for a multi-year mainframe-to-GCP transformation, coordinating executive steering, budgets, vendor commitments, security and compliance governance, and continued support across legacy and cloud environments.
- Migrated hundreds of enterprise customers and applications from mainframe connectivity to a GCP-based network-security and Apigee/API architecture, coordinating cutovers across application, network, security, and client-partner teams serving banks and telecom providers.
- Led a one-week decommissioning effort across two active data centers, coordinating 30+ people and five vendors to securely retire 4,000+ hardware components and PII-bearing drives with zero incidents; managed asset and audit trails, vendor completion approvals, and invoice sign-off.

MANULIFE - Core Technology Transformation

Program Manager **Sep 2018–Oct 2019**

Toronto, Ontario · Financial-services and insurance organization · Cognizant, client-embedded

- Led Manulife's first OCR-based claims-automation pilot, coordinating Agile delivery across claims, technology, and insurance product teams. Managed client relationships and Cognizant's delivery commitments under the statement of work.
- Directed a security-sensitive migration of personally identifiable information from legacy drives and mainframe systems to Microsoft Azure, aligning Product, Legal, Data, and Infrastructure teams on retention and encryption requirements.

BRIDGEWATER ASSOCIATES - Core Technology

Sr. Project Manager **Jan 2015–Sep 2018**

Stamford, Connecticut · Investment-management firm · Cognizant, client-embedded

- Managed contracted engineering service delivery across Windows applications, COTS products, and SQL databases; led service-performance reviews, client escalations, staffing, and support continuity across shared teams.
- Led infrastructure modernization spanning approximately 800 Windows servers, 5,000 databases across 300+ servers, and more than 30 application platforms, coordinating migration risks, operational readiness, and support handoffs.

EARLIER CAREER

NYK LINE

Technical Project Manager **2011–2014**

Secaucus, New Jersey · Shipping liner · TCS, client-embedded

Managed the support team and governed ITIL Incident, Problem, and Change Management processes for the technology organization of a major shipping company; also ran firm-wide critical-incident calls.

TATA CONSULTANCY SERVICES

Software Engineer

New Delhi, India **2008–2011**

Maintained and enhanced a .NET contracts application used between vendors and Maersk Line, including production support, incident triage, reporting, and deployments.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

FinOps Certified Practitioner (2026–2028) · Nebius AI Leader (2026) · Microsoft Certified: Azure Fundamentals (AZ-900) · Certified ScrumMaster (CSM) · Certified Scrum Product Owner (CSPO) · SAFe Scrum Master (SSM) · ITIL Foundation

Training: NVIDIA — AI Infrastructure and Operations Fundamentals (2026) · Project Management — University of California, Irvine Extension

EDUCATION

Bachelor of Engineering, Electronics & Communications - Rajiv Gandhi Technical University, India · 2004–2008
